## DETAILED ACTION

### Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-72 of U.S. Patent No. 6,439,995 and claims 1-76 of U.S. Patent No. 6,595,854. Although the conflicting claims are not identical, they are not patentably distinct from each other. In particular both the '995 patent and the '854 patent claim gaming devices which display multiple selection groups wherein (i) a first selection group includes award indicators and picks indicators; and (ii) a subsequent selection group includes award indicators and the number of selection picks in the subsequent selection group corresponds to the value of the selected picks indicators. Thus, in view of the gaming devices claimed in the '995 patent and the '854, it would have been obvious to an artisan at the time of the invention to modify the gaming devices claimed the '995 patent or the '854 patent to display multiple selection groups wherein a first selection group includes award indicators and

picks indicators; and a subsequent selection group includes award indicators and the number of selection picks in the subsequent selection group corresponds to the value of the selected picks indicators.
